The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

ADVERTISING RATES.

Wanted.—One cent a word each insertion. Local.—Ten cents per line each insertion. Reading Room.—Preferred position.—Twenty-five cents per line each insertion. Displayed.—Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly. Additional prices and particulars given on receipt of copy of matter to be inserted.

WEDNESDAY, JUNE 22

Colonel Bryan's cry of "imperialism" scares mighty few people. The country just now is not in a mood to be scared.

New Mexico's quota of 75 recruits for the 1st U. S. volunteer cavalry will be filled in a hurry. Ten times the number of volunteers can be had as easily, should a call be made.

A Santa Fe girl has three sweethearts among the New Mexico volunteers and is getting ready to send a fourth. There is true and high-minded patriotism for you that stops at nothing.

If the leading merchants and property owners of Santa Fe showed something like the public spirit, existing in Las Vegas, there would be a different condition of affairs in this city.

The people of this country are still being entertained with pipe stories about Admiral Camara's redoubtable fleet and the great fighting qualities of the Spanish battleship Pelayo, but that is as far as the matter has taken shape.

The Paris edition of the New York Herald and the New York edition of the same are in trouble. They cannot agree as to the conduct of this war. Mr. Bennett should appoint a strategy board and compel peace.

Perhaps, in the golden era to come, some of the public spirit of Las Vegas will strike Santa Fe. If it ever does there will be such a transformation in the City of the Holy Faith that its most intimate friend will not recognize the place.

It's dollars to doughnuts that the arrival of United States troops at Santiago did not cause any feeling of disappointment or jealousy among the marines who have been bravely holding Cuban ground against the attacks of Spanish soldiers.

Denver is in ecstasies of delight. Two thousand handsome women have been induced to visit that place after many years of trials and disappointments. Well, that city will do its prettiest by the members of the Federated Women's clubs while they remain.

The Republicans in Ohio are having a jolly time these convention days. It won't be so much fun, however, if the Democrats walk off with the cake this fall. "United we stand, divided we fall" is a pretty good motto to be observed, even by strong political parties.

Young Joe Leiter and his respected father, who are putting up a million of dollars or two, to make good the losses on the young man's wheat deal, know more about wheat now than they did a month ago. They are sadder and wiser men and somewhat lighter in purse.

Colonel Bryan, with his regiment, having been assigned to duty under Major General Lee, the Bryan enthusiasts are already shouting for Bryan and Lee in 1900. However there is many a slip betwixt the cup and the lip and General Lee is said to be a gold bug of the most pronounced yellow stripe.

New Mexico has already received a large amount of free advertising through the fame of "Teddies' Terrors," but just wait until the boys have a chance to go into a real fight. Then New Mexico will become the land of heroes for sure and every man in the volunteer service, from the members of the dandy New York battery to the Colorado regiment, will wish he hailed from New Mexico.

The admirals and major generals in the offices of the yellow fake journals are dissatisfied with the conduct of the war. They chafe at the delay. They are bloody minded and want fight. This would make the news interesting and sell papers and that is all the gallant and skilled major generals and admirals in yellow paper editorial offices care for.

The 8th army corps has been formed with General Wesley Merritt in command. On arrival in the Philippine Islands, General Merritt will turn the command of the army corps, which will consist of about 21,000 troops, over to Major General Otis and assume the duties of military governor. The right man in the right place, judging from his past record and achievements.

Effect of New Government Loan.
All reports regarding the taking of the \$200,000,000 government loan from the Treasury department, indicate that had the issue of bonds been \$1,000,000,000 in place of the former, the American people would have taken that amount just as quickly as

NEW MEXICO CROP CONDITIONS.

Vegetation Doing Well—Medium Quantity of Fruit But of Fine Quality—Stock in Pink of Condition.

U. S. DEPT. OF AGRICULTURE. Climate and Crop Bulletin of the Weather Bureau, New Mexico Section. (Santa Fe, N. M., June 21, 1898.)

The weather during the week ending with Monday, June 20, was characterized by high temperature and local thunder showers, conditions most favorable to the rapid growth of crops. The fine rains of the last two weeks not only have refreshed the crops in the ground, but also have been of great benefit in preparing the soil for late planting, which is being pushed rapidly to completion under the favorable conditions. There is no longer complaint of cold nights, although the evil effects of the cool nights of last week, and previously, especially on fruits, are becoming more apparent.

Wheat, barley and oats continue in a promising condition. Wheat is ripening rapidly and in the south some fields are about ready for harvesting. Corn, which has been very much behindhand both in plant and planting, has made a wonderful improvement in the last ten days. In southern counties the first crop of alfalfa has been secured under favorable conditions, and with about an average yield, and in some more forward localities preparations are being made for the second cutting. In the most northern counties the first cutting is now becoming general.

Fruits as a rule continue promising, although the results of the late frosts and the recent cold nights in more exposed sections are causing considerable loss from dropping. The prospect for fruits generally is for a medium yield of fine quality. Vineyards continue in good condition and the young grapes are of good size. Cherries are ripening and are of fine quality.

The recent rains have greatly revived the grass on ranges, and have been of particular further benefit to the stock men in filling outside water holes. There have been daily rains in the mountains, and reservoirs and streams are well filled, practically assuring a sufficient supply of water for the season.

The following remarks are selected from the reports of correspondents, and will prove of interest:

Altoona—C. E. Mead—The week as a whole has been unusually cloudy, though calm and agreeable. A good many farmers have cut their first crop of alfalfa, while the majority are just beginning. A fine rain on the 10th; amount, 0.71. Total rainfall, 0.81.

Bernalillo—Brother Gabriel—Fine showers on the 7th, 10th, 14th and 18th, causing an improvement in the growth of gardens, fruits and vineyards. Vines have finished blooming, and grapes are of a good size. Second crop of alfalfa coming out strong, on some fields the growth is from 12 to 18 inches. Wheat beginning to ripen. Ranges are fair. River has a good supply of water, and irrigation ditches are full. Rainfall, .25.

Bluewater—J. S. Van Doren—Summer showers frequent on the mountains; a light rain falling here on the 18th. Grasses growing well, and grazing good. Wheat, oats and alfalfa show a good growth. Rainfall, .10.

Chief—T. J. Clark—A rain five days straight but only a little each day. Soil wet to the depth of about three inches. Fields and range wonderfully improved. Live stock in very good condition. Plenty of water in the Gila, and to spare.

Eddy—John S. Shattuck—Good growing week for grass and field crops. Heavy hail on the 9th, but doing no serious damage. Stock of all kinds in fine condition; outside water holes have been well replenished. Total precipitation, .342.

Farmington—L. G. Willett—Warm

weather and crops of all kinds growing nicely. The first crop of alfalfa now being cut, and is an average yield. Good rains in the mountains, and rivers are high. Stock is fat but the ranges need rain. There is some complaint of apples falling on account of the cold nights. Cherries are ripe; the fruit is large and fine but the yield medium. Prospects for a better market for all kinds of fruit this season.

Frisco—Clement Hightower—Since May 5 the nights have often been cold enough to form ice, but the weather has been so dry that there has been no damage from frost. Good showers lately, and there is sufficient water for irrigation. Stock is in good condition. All crops look well. Grasshoppers reported to have done considerable damage both on Tularosa and San Francisco creeks. Gallinas Springs—Jas. E. Whitmore—Fine thunder showers during the week, with hail, but no damage. Grass and all crops much improved. Rain, .38.

Las Cruces—Cayetano Thompson—Sultry weather and no rain. Some wheat fields ready to harvest. Corn growing rapidly. Early fruits ripening rapidly. Plenty of water for all purposes.

San Marcial—J. W. McCoach—Corn looking very well; wheat is fine, and will soon be ready to harvest. The second crop of alfalfa nearly ready to cut. The range has brightened up wonderfully since the fine rain of the 10th.

Santa Fe—U. S. Weather Bureau—Excellent growing week. The temperature has been about normal, with bright mornings but afternoon showers visible from the station nearly every day, although little has fallen at Santa Fe. Crops have advanced rapidly; first cutting of alfalfa generally secured, and in fine condition. Fruits continue very promising; early cherries are ripe. Rain, .01.

Proceedings of the Board of County Commissioners.

Santa Fe, N. M., June 6, 1898.—The board of county commissioners met at 10 o'clock a. m. Present, Hon. Chas. W. Dudrow, chairman; Hon. J. T. McLaughlin and Hon. Jose Amado Lucero, commissioners, and Atanacio Romero, clerk.

The minutes of the two previous sessions were read and approved. The board was then convened as a board of equalization and proceeded to examine the tax returns for the different precincts of the county.

The following returns were raised; to wit: Mrs. W. H. Manderfield, from \$1,500 to \$3,000 on improvements.

Geo. W. Hickox, from \$405 to \$1,405 on merchandise.

American Turquoise company, from \$150 to \$2,500 on mining property.

Peter Mackel, from \$365 to \$565 on merchandise.

John Krick, from \$350 to \$425 on merchandise.

Barret Sugar, from \$500 to \$600 on real estate.

Thosello & Gaudino, from \$355 to \$555 on personal property.

The board adjourned until June 7, at 9 o'clock a. m.

June 7, 1898.—The board of county commissioners met at 9 o'clock a. m. Present, Hon. Chas. W. Dudrow, chairman; Hon. Jose A. Lucero and Hon. J. T. McLaughlin, commissioners, and Atanacio Romero, clerk.

The minutes of the last session were read and approved.

The board proceeded as a board of equalization to examine the balance of the tax returns of the county and the following returns were raised:

Ascension Chavez, \$1,006 to \$2,506 on personal property.

Deciderio Gomes, from \$212 to \$332 on personal property.

L. D. Sugar, from \$425 to \$925 on merchandise.

THE SEVENTH Beet Sugar factory in the United States was erected at Eddy, New Mexico, in 1896, and made its first "campaign," beginning November 15th, 1896, and closing February 15th, 1897.

THE CONTENT OF "SUGAR" in the beet of the crop grown in the Eddy and Roswell sections of the valley has proven to be more uniformly high than any other part of the United States.

FORTUNATELY the land is blessed with just the fertility to produce high grade beets, and

MORE FORTUNATELY the Pecos Irrigation and Improvement Co. and the Roswell Land and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in the day and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

124 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet root, on new land and under very trying circumstances, as the factory was not assured until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

THE SUGAR BOWL OF THE GREAT Southwest Is the Rich Valley of the Rio Pecos. IN THE COUNTIES OF **EDDY AND CHAVES** OF NEW MEXICO.

GOOD SOIL makes the seed germinate. **WATER** makes the plant grow.

SUNLIGHT puts the sugar in the BEET.

THE ONLY THING left to be desired that the Pecos Valley has not on hand in abundance is PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.

NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.

WRITE for particulars.

S.S.S. Scratch! Scratch!
The tortures of Eczema are indescribable. First, a series of small water blisters appear, accompanied by a tingling, itching sensation; these burst, and the skin becomes dry and sometimes cracks and peels; the itching increases in severity and spreads over a larger surface, until it soon becomes almost unbearable. The rough, red skin seems to be ablaze, so intense is the suffering produced.
Only disappointment results from the use of ointments, salves, etc., which are so generally resorted to for this disease. Eczema is a disease of the blood, and local applications can have no effect whatever upon it. They are good enough to allay temporarily the intense itching, but the disease continues to spread and increases in severity.
It is during spring and summer that those afflicted with Eczema suffer most, although they are at no time entirely free from discomfort. The disease seems to break out afresh each spring, and every year seems to spread a ore, until in some cases the entire body is effected.
Mr. E. D. Jenkins, of Lithonia, Ga., says that his daughter, Ida, inherited a severe case of Eczema, which the usual mercury and potash remedies failed to relieve. Year by year she was treated with various medicines, external applications and internal remedies, without result. Her sufferings were intense, and her condition grew steadily worse. All the so-called blood remedies failed to reach the disease a all until S. S. S. was given, when an improvement was at once noticed. The medicine was continued with favorable results, and now she is cured sound and well, her skin is perfectly clear and pure, and she has been saved from what threatened to blight her life forever.
Mr. Wm. Armstrong, of DePere, Wis., writes: "I have suffered terribly for eight years with Eczema, at times all over my body, and no person can describe the burning and itching I had to endure. For three months I never laid down, but was compelled to sit in my chair when not moving around. I was treated by the best of physicians with no success, used various local applications, and tried all the patent medicines recommended for Eczema without any good results. I went to several celebrated medical resorts, but the disease shortly returned. I then tried S. S. S., and after three days the burning and itching subsided, and I continued to improve steadily until I was well—entirely cured."
For Eczema
the only blood remedy guaranteed purely vegetable, containing no potash, no arsenic, no mercury or mineral of any description. It is Nature's own remedy and is not a drug-shop preparation. It cures Eczema and all other blood diseases of the most obstinate nature, no matter what other treatment has failed.
Swift's Specific.
The only cure is a real blood remedy—one which reaches obstinate and deep-seated diseases, and cures them permanently. The mercurial and potash remedies of the doctors, aside from their harmful effects, do not reach the disease, and hence their inability to cure it. S. S. S. is the only cure for Eczema, because it is the only blood remedy guaranteed purely vegetable, containing no potash, no arsenic, no mercury or mineral of any description. It is Nature's own remedy and is not a drug-shop preparation. It cures Eczema and all other blood diseases of the most obstinate nature, no matter what other treatment has failed.
